

Bobcat®

COMPACT EXCAVATORS

E26 E27z E27

One Tough Animal®

REDEFINING INDUSTRY STANDARDS...

The Bobcat R-Series E26 – E27z – E27 are built around the operator to provide a roomy comfortable cab, easy operation, and great visibility. These machines are amazingly stable – providing both high-performance and safe transportability.

The lower transport weight means that they offer a blend of traditional Bobcat performance and best-in-class controllability. Plus, for guaranteed reliability and durability, the latest technology has been used throughout their design and manufacturing – so you can work without any interruptions.

- Enjoy the famous Bobcat performance with even smoother working functions
- 5 customizable hydraulic auxiliary circuits – excellent stability and ease as you operate even the most complex and heavy attachments
- Full control of your surroundings – thanks to the great visibility through larger glass area and excellent ergonomics
- All configurations fit on the trailer - and no worries about weight limits
- With the E27z Zero House Swing (ZHS) – benefit from 20% more freedom of movement than with a classical zero tail swing (ZTS)

E26 – Unique, lighter and tougher

- Perfect transport weight w/ cab: below 2.5 tons
- Innovative Cylinder Inside Boom for extra robustness
- Exceptional value for money

E27z – More stability and comfort with ZHS format

- Zero House Swing for peace of mind, even with open door and heavy counterweight
- Largest cab on the market for this size of machine
- Lower weight so more attachments can be towed together on a trailer without compromising performance
- Highest flexibility of movements when working close to walls

E27 – Better performance

- Unique combination of superior stability, + class-leading digging force
- Transport weight below the weight limits for appropriate trailers
- Only 220 mm (std.)/ 280 mm (heavy) of tail overhang which allows the machine to be still operated in confined spaces
- Ideal tool for highly demanding applications where performance together with transportability have a priority over compactness

LOWER TRANSPORT WEIGHT, GREATER 360° STABILITY

The difficult match

The goal: greater stability while making the machines lighter for comfortable transport on trailers. We achieved this by optimized geometry and new counterweight concept. The improved stability makes our new models ready for the most difficult operations while maintaining the ZHS or RTS functionality.

Transportability

- The European Transport Regulations specify a maximum towable weight of 3500 kg.
- All 3 new Bobcat models are towable on most trailers in multiple configurations.
- And transportability is made even easier with the new integrated upper-structure tie-down points.

BEST-IN-CLASS CONTROLLABILITY WITH EXCEPTIONAL PERFORMANCE

Zero House Swing (ZHS) concept for E27z

The Bobcat Zero House Swing (ZHS) concept enhances Zero Tail Swing (ZTS) functionality by further protecting the front upper structure corners as they turn within the swing circle.

The design of Bobcat machines also eliminates the 'unicorn' effect of having the boom swing cylinder exposed during parallel digging.

Smooth operation

While making these machines smoother and easier to operate, we kept the famous Bobcat speed. The optimized hydraulic system and the new joysticks with dual curve response guarantee exceptional performance and best-in-class controllability.

BUILT AROUND THE OPERATOR

Great features for extra comfort
Bobcat's new E26, E27z and E27 excavators offer +25.4 mm wider operator space and a new luxury cab that delivers best-in-class visibility. The new features also include exterior covers that open and close effortlessly for easy maintenance.

1. Instrument panel

Clear and easy to reach, the display features an indicator for the automatic light switch-off function, optional keyless ignition and operational information such as hours, rpm and job clock.

2. Second speed, auto-shift and auto-idle

The travel motors automatically return to high speed after downshifting under load. So, turns are smoother and dozing work is easier. Auto-idle is available as an option to reduce fuel consumption.

1 - Standard display

1 - Deluxe display

3. Floating blade

Automatically controlled blade flotation for quick and easy levelling operations.

4. Thumb control for boom swing and auxiliary hydraulics

A thumb control is integrated in the joystick for better metering of the boom swing and the proportional auxiliary hydraulics.

5. External fuel cap

The external lockable fuel cap makes refueling easy and safe. For extra convenience when refilling, a warning beep sounds when the maximum fuel level has been reached.

6. Zero Tail Swing design

The upper structure remains within the width of the tracks even when operated with the door open.

DURABILITY & RELIABILITY

Reliability added in every feature

- Rear tailgates protected by casted counterweights
- Metal covers can be opened or bolted on
- Reinforced workgroup to minimize freeplay and maximize durability
- New robust protection for boom cylinder
- Proven boom and dipperstick design
- Blade design enhances robustness and self-cleaning
- Increased protection for hoses, pipes and valves
- Wrenchless hydraulic hose technology helps prevent leakage
- 2-piece blade cylinder hoses
- Maintenance-free track rollers and idler
- Auto-tensioning and maintenance-free fan and alternator
- Battery disconnect for storage and transport

Tough materials, tested design

Highly durable materials make the Bobcat excavators hard-wearing and robust. The design features are tested under extreme conditions – and the heavy steel gauge tailgate ensures extra durability and peace of mind while working.

**Enhanced level of Fit & Finish for exterior covers, cab & canopy, workgroup
Paint quality meets highest customer expectations**

MAINTENANCE AND SERVICE

Famous Bobcat access for regular maintenance

Side-by-side coolers for easy cleaning

Easy access to upper structure components thanks to:

- 2-piece floor mat
- Easy-to- remove floor covers

Diagnostics are easy thanks to display error codes on control panel and service tool connection:

- Connector for easy installation of GPS unit (telemetry)

Designed and tested for life-long performance:

- Materials, components and structures have been tested stringently for endurance under extreme conditions

The unrivaled design, quality and durability of Bobcat Genuine Parts ensure minimum downtime and keep your machines performing optimally.

Your compact equipment is essential to your business. As it completes difficult tasks on time and keeps your schedule moving forward, it generates maximum income. So, a solid maintenance plan can help you rest easy.

BobCARE PM is Bobcat's factory-advised and scheduled inspection, service and maintenance program

- Reduces financial risks and safeguards your assets thanks to proper maintenance
- Increases your productivity

Extended warranty at Protection Plus conditions

- Extends your sense of security by minimizing repair costs
- Assures full confidence in repair quality thanks to certified mechanics and Bobcat Genuine Spare Parts and materials

Quick and easy servicing

Bobcat is expert at designing, engineering and manufacturing the tough compact equipment you rely on. With BobCARE PM planned maintenance and Protection Plus Extended Warranty, you can benefit from our expertise for the full lifetime of your machines.

STANDARD FEATURES

E26 - E27z - E27

Adjustable double acting auxiliary hydraulic (AUX1) with Quick Couplers
 Battery disconnect
 Blade float feature
 Control console locks
 Cup holder
 Engine/hydraulic monitor with shutdown
 Foldable and ergonomic pedals
 Full fuel warning alarm
 Grease gun holder
 Horn
 Proportional fingertip auxiliary and boom swing offset hydraulic control
 Retractable seat belt
 TOPS/ROPS/FOPS canopy*

Two-speed travel with Auto shift
 Upper structure four-point tie down
 Water separator
 Work light (boom)
 Warranty: 24 months, 2000 hours (whichever occurs first)

E26

1500 mm dozer blade
 250 mm rubber track
 Seat with high back

E27 - E27z

1500 mm dozer blade
 300 mm rubber tracks
 Clamp ready
 Suspension seat

OPTIONS

E26 - E27z - E27

1st AUX hydraulic on arm
 2nd AUX hydraulics
 Additional lights (2+1)
 AM/FM stereo radio
 Beacon
 Bucket diverter valves (AUX3) kit
 Case drain line
 Dlx textile suspension seat
 Direct-to-tank-AUX1 line
 Fire extinguisher
 Keyless ignition
 Klac coupler
 Left and right mirror
 MS03 coupler
 Object handling device (safety valves + overload warning device + lift eye)
 TOPS/ROPS/FOPS cab with heater
 Travel motion alarm

E26

Suspension seat

E27 - E27z

Auto idle
 Bobcat hydr. pin grabber
 Clamp with AUX1 diverter
 Heavy counterweight
 HS03 coupler or tilt coupler with lift eye
 Hydr. coupler lines (AUX5)
 LED lights set
 Steel tracks
 Tilt coupler lines (AUX4)

E27

Long dozer blade

*Roll Over Protective Structure (ROPS) – Meets requirements of ISO 3471. Tip Over Protective Structure (TOPS) – Meets requirements of ISO 12117. Falling Object Protective Structure (FOPS) – Meets requirements of ISO 3449.
